HANDMADE RUGS BY

LINIE DESIGN

SHAPES, COLOURS AND STRUCTURES BRING PERSONALITY TO LIFE

Shapes, colours and structures bring personality to life. At Linie Design we make your choice obvious. Based on classic craftsmanship we have made rugs since 1980 always interspersing a modern expression. Quality, functional comfort and aesthetic simplicity are woven like natural threads in our beautifully crafted pieces.

Stylish, timeless patterns demand dedicated creators. That is why our rugs are designed by acknowledged Danish designers. We praise our Nordic design tradition and are proud of spreading world-class design everywhere in the world. To the very last millimetre all rugs are handmade by Indian master artisans, who have perfected their unique skills through generations. All weavers are adults with safe working conditions, and we also care for 350 local children who attend the Linie Design School.

We never miss a chance to improve. In the constant search of surprising surfaces and design expressions we reshape, redefine, reinvent and recombine. Our rugs open your eyes, but also your sensations. They enrich your everyday life with visual, tactual and auditory joy.

Step into our world of aesthetic style!
